PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience specializing in building reliable CI/CD pipelines, container orchestration (AKS/Docker), and automated cloud operations. Expert in establishing robust Git-based version control workflows and infrastructure-as-code deployment strategies using Terraform and Bicep. Proven capability to automate repetitive developer tasks, decrease deployment cycles, and bridge the gap between development and platform operations.

TECHNICAL SKILLS

- **CI/CD & DevOps Tools:** Azure DevOps, Jenkins, Git, Git-based workflows
 - **Containerization & Orchestration:** Docker, Kubernetes (AKS), GitOps (ArgoCD)
 - **Infrastructure as Code (IaC):** Terraform, Bicep, Ansible
 - **Automation & Scripting:** Python, PowerShell, Azure CLI
 - **Monitoring & Observability:** Prometheus, Grafana, DataDog, Azure Log Analytics, WhatsUp Gold
 - **Application Stack:** React, Node.js
-

PROFESSIONAL EXPERIENCE

Associate Platform Engineer

Sapiens, Bangalore | *June 2025 – Present*

- Designed and optimized automated CI/CD pipelines within Azure DevOps, minimizing manual intervention and drastically increasing deployment reliability.
- Managed enterprise-grade Azure Kubernetes Service (AKS) environments, handling continuous delivery, scaling, and container troubleshooting.

- Architected a continuous integration flow utilizing Git-based version control and Docker to automate image builds for an internal platform dashboard.
- Built automated delivery systems to deploy containerized web applications straight to Azure Web Apps automatically.
- Leveraged Python and PowerShell scripting to automate manual code deployment steps and software patching cycles.

Junior Associate Consultant

Sapiens, Bangalore | *July 2023 – May 2025*

- Enhanced and fine-tuned pre-existing Azure DevOps pipelines, achieving measurable improvements in continuous deployment speeds.
- Maintained Infrastructure as Code (IaC) templates using Terraform and Bicep to seamlessly spin up/tear down 15+ testing and staging environments.
- Orchestrated configuration management using Ansible to maintain consistent environment baselines.
- Set up telemetry dashboards via DataDog and Azure Log Analytics to ensure full observability over CI/CD pipeline health and container deployments.

Junior Associate Consultant - Intern

Sapiens, Bangalore | *Jan 2023 – June 2023*

- Implemented basic automation scripts, assisted with pipeline maintenance, and practiced Git version control workflows.
 - Contributed heavily to DevOps runbooks and troubleshooting documentation.
-

EDUCATION

- **B.Tech in Computer Science and Engineering**
Amrita School of Engineering, Bengaluru (2019 - 2023)
-

CERTIFICATIONS & TARGET COURSES

- **Microsoft Certified: Azure Administrator Associate (AZ-104)**
- **Certified Kubernetes Administrator (CKA)** — *In Progress*

- **Microsoft Certified: DevOps Engineer Expert (AZ-400)** — *In Progress*
